

Initial Build Notes

- Character carousel on home page: would prefer for user to be able to scroll through; can also have button to all characters page
 - Can click on each item in the carousel to navigate to specific character page
- Writing styles and themes on home page: don't need scrolling/carousel, just resize so that all 4 can fit on the screen
 - For smaller screen sizes, have the cards stack on each other
- Interior pages
 - Have sections of text with corresponding images
